

ClearShield Surface Protection Option **For Hy-Line Shower Doors**

Hy-Line Sales Ltd. is pleased to announce that we have been appointed as authorized "Factory Applicators and Distributors for ClearShield Surface Protection" for Shower Doors in British Columbia. This surface protection is highly recommended for any shower door installation to help eliminate soap, calcium, and condensation residue, and specifically for areas serviced by well water and any "hard water" geographic locations. Factory applied ClearShield will offer years of protection when regular recommended cleaning and maintenance procedures are followed.

The factory application to the glass surfaces is supplied when the door is ordered, and is not an "on-site" option. ClearShield applications help eliminate or restrict:

- Mineral Deposits
- Water Spots
- Airborne Pollutants
- Rust Stains
- even bacteria build up....

The surface protection from ClearShield is based upon a strong multi-molecular bonding system resulting from a layered applicator process on the inside glass panel(s) of the door. Hy-Line also offers a "ClearShield AfterCare" spray-on product for periodic application to any ClearShield treatment we provide. For any existing shower door that does not feature a ClearShield treatment, we also offer a "ClearShield LimeScale Remover" to help clean stubborn stains, water marks, etc. from your glass.

Please consult page 79A of our Shower Door Price List dated Nov. 1, 2008 for pricing on ClearShield, ClearShield AfterCare, and ClearShield LimeScale Remover. Pricing is listed PER DOOR...1 side only.....if your client requires both sides to be treated, please specify on the Purchase Order. A special label confirming the ClearShield application is applied to each panel we treat.

ClearShield.....a great investment in your client's Shower Door.

Please contact your Hy-Line Rep to learn more.

Thank you for your continued support,

Hy-Line Sales Ltd.
